

# Department Report

---

Report Title: Water & Wastewater Treatment Department Report September 2023

Report Highlight: We received our report from the EPD on the Sanitary Survey that was conducted on our Water System. I am happy to report that only minor deficiencies were noted in their findings and all but one of the deficiencies will be corrected before the response letter is mailed within the 45-day requirement. An updated Water Conservation Plan will have to be submitted to them when we complete the request hopefully in the next couple of months. Only older versions of the plan could be obtained at the time of the inspection. The Wastewater Plant was able to hire an employee for the vacant spot. The gentleman is working out his two week notice with his current employer and will be joining our force later this month.

Name and Title: John Jarrard, Water/Wastewater Treatment Director

## Recently Completed

- Replace chlorine feed line to Caustic CIP Tank
- Repairs to antenna at Lower Crown Mountain Tank
- Replaced the surge protector at Sky Country Tank
